Dear Mr. Wood

In ref to the print you sent me, the defect was due to a plate holder, which owing to transmitted light to get a lighter back ground, caused the letter to impress its self on the negative.

The only neg I could find was one without the ribbon and I enclose a print of it.

I would suggest either to air brush out the faint wording or to paste the ribbon on the new print.

They were photographed to scale & will match.

I regret this happened.

I took this matter up with Eastman Kodak Co, & they are now putting a difference back in the holders.

Very Truly

P. B. Wallace
